Profile

Computer Science undergraduate (Cloud Computing & Automation) with hands-on experience building and deploying production-ready web applications and ML systems on AWS. Proficient in Java, Python, JavaScript, React, Node.js, and SQL, with demonstrated ability to deliver measurable improvements in performance, reliability, and user experience.

Education

VIT Bhopal University, Madhya Pradesh

B.Tech in Computer Science [Cloud Computing & Automation]

CGPA: 8.55 / 10

Sept 2023 – Sept 2027

Work Experience

Dragonfruit AI

Software Development Engineer

Remote

May 2026 – July 2026

- **Alarms App:** Refactored multi-step alarm wizard into a tabbed sidebar drawer with 4 direct-access tabs, unsaved-change indicators, and real-time camera updates across 9 commits (+2,482 / –2,346 lines).
- **Control Panel:** Designed and implemented a granular client-side editing system for Onboarding fields (Basics, Contacts, Escalation), architecting a timezone-aware Event Logs filter reflected consistently across table, CSV, and chart; fixed Base Station serial number reset bug using `useMemo` to memoize initial form values.
- **Juvant (Dragonfruit AI Venture):** Investigated a Claude Code skill-routing collision — ran 100 structured prompts across 6 test groups, identified root cause in LLM semantic similarity matching on skill front matter, and delivered a findings report adopted by the team; debugged install prompt failures across Sonnet and Opus, isolating 3 refusal triggers and unblocking the customer onboarding flow.

Projects

FaceMatrix [Real-Time Attendance System]

Face Recognition System | [GitHub](#)

Mar 2025

Python, Flask, MongoDB, Node.js, React.js

- Built a real-time facial recognition attendance system supporting 1,000+ users; led full frontend development in a cross-functional team.
- Designed dual-admin authentication layer, reducing unauthorised access incidents by 25%.
- Optimised pipeline with multi-threading and face-encoding compression, cutting DB query time by 30% and achieving sub-630 ms end-to-end response.

ExigentCX [Fractional Leadership Marketplace]

Full-Stack Web App | [GitHub](#)

April 2026 – Jun 2026

React.js, Vite, TailwindCSS, Node.js, Supabase (PostgreSQL)

- Owned the entire frontend product solo, architected a two-sided marketplace connecting companies with fractional CXOs, spanning a 12-page Company Dashboard, Expert Dashboard, and public site.
- Built a complete dark mode design system from scratch with custom brand-matched color tokens, an animated logo, and a LinkedIn-style follow/connect networking layer.
- Resolved a Tailwind v4 specificity conflict and a Framer Motion inline-style override bug breaking dark-mode hover states, restructuring styling logic to eliminate both issues platform-wide.

VendyGo [B2B Street-Food Marketplace]

Full-Stack Web App | [GitHub](#)

Jul 2025

React.js, Tailwind CSS, Node.js, MongoDB, Netlify

- Architected a B2B marketplace for real-time vendor–wholesaler trading, scaling to 100+ monthly active users.
- Engineered a co-op bulk-buy module, increasing small-vendor purchase volume by 30% and improving inventory turnover by 25%.
- Integrated secure payments, live notifications, and JWT auth; Reduced transaction failures by 10% and improved user retention by 25%.

Technical Skills

- **Languages:** Python, JavaScript (ES6+), Java, SQL, HTML/CSS
- **Frontend:** React.js, Tailwind CSS, Redux
- **Backend:** Node.js, Express.js, Flask, REST APIs
- **Data/Databases:** MongoDB, MySQL, Pandas, NumPy, OpenCV, Matplotlib
- **Cloud & DevOps:** AWS (EC2, S3, Lambda), CI/CD Pipelines, Git, GitHub, Vercel, Firebase

Achievements & Certifications

- **3rd Place** Face Recognition Hackathon, IIT Indore (Fluxus 2025).
- **1st Prize** Android Club Coding Event, VIT Bhopal.
- Selected among **top 83 teams** [Pragati AI Hackathon by Meta / Hack2Skill], for AI solutions targeting social good.
- Google IT Support Professional Certificate [Google].
- Applied Machine Learning in Python [University of Michigan (Coursera)].
- Full-Stack Web Development Bootcamp [Udemy].
- Introduction to Internet of Things [NPTEL].
